

# Utility SHEA Water Passport

## Course Name.

SHEA Water Passport also known as the Energy & Utility Skills - Utility SHEA (Water) Passport.

## Who needs this qualification?

The water company may require that anyone who is involved in the operational activities of the water industry or who may require access to operational sites attends this course.

## Course Content.

The Utility SHEA Water course is made up of thirteen modules that cover safety, health and environmental awareness topics for the clean water network, the sewerage network and process operations. These modules are as follows:-

1. Your Responsibilities
2. Risk Assessment
3. Workplace Procedures
4. Physical Hazards (part 1)
5. Working in the Highway (for the water network or the sewerage network)
6. Physical Hazards (part 2)
7. Excavations (network specific)
8. Sewerage Network
9. Process Operations (Process Specific Module)
10. Hazards to Health (part 1)
11. Hazards to Health (part 2)
12. Hygiene and Health
13. The Environment

## CSCS Affiliation

The SHEA Water Passport is affiliated with the CSCS Scheme to allow water industry workers access to construction sites for utilities work without the need to obtain a CSCS card.

## Where is the training held?

The training can be held at your offices, a venue of your choice or at our training premises in Warrington, Cheshire.

## How much does it cost?

This depends on location and numbers requiring training - call us for a quote.
